DECISION

- 1 The applicants for revocation have expressed their willingness to withdraw their application on the basis of unconditional amendments filed with the patentee's counterstatement on 17 January 2002. The amendments were advertised on 13 March 2002 and no notice of opposition to them has been filed.
- 2 Having carefully considered the objections originally raised by the applicant, I decide to allow the specification to be amended as proposed and make no order for revocation of the patent.
